Client / API Key

Web Settings · https://wiki.simfly.io/docs/client-api-key/

The "Client/API Key" section allows you to download the SimFly Client software for free.

In this section, you will find a detailed video tutorial that guides you step by step through the installation process and setting up the API key, which is essential for the initial use of the software.

Additionally, you have the option to generate multiple API keys, rename them, or delete them as needed.

For more information, you can refer to the documentation available in this section.
