Earning and Trading in the SimFly Economy

In-Game Manual · https://wiki.simfly.io/docs/earning-and-trading-in-the-simfly-economy/

Dive into the rewarding world of SimFly, where every successful flight converts your piloting skills into real economic value. Take part in a vibrant, asset-driven virtual economy that lets you earn, trade, and grow a true aviation business.

Earn as You Fly

Every activity rewards you with **PAX credits**. The more often you fly, and the better you manage airports, airplanes, and other resources, the faster your balance grows. Each mission sharpens your skills and advances your career by boosting your PAX tokens earnings.

Owning Your Digital Assets

Pilots can acquire and control airports, airplanes, and licenses. These unique **digital assets** live safely on SimFly’s servers, giving you genuine ownership without the need for external wallets or third-party services. Buy, sell, or trade whenever you wish.

Asset Ownership and Trading

All assets are tracked in your SimFly account for maximum security and exclusivity. Use your PAX tokens to purchase new items or upgrade existing ones, building out your fleet and infrastructure. A streamlined transfer system lets you trade directly with other pilots, turning smart management into real-world value.

The SimFly Marketplace

Our marketplace is the beating heart of SimFly’s economy. Here you can list and exchange airports, airplanes, and licenses for USD or PAX tokens. Whether you are flipping a single aircraft for quick profit or assembling a full network of hubs, the marketplace is where your economic journey begins.

Build Your Virtual Empire

Strategic acquisition and smart management let you grow from solo pilot to aviation magnate. Expand your holdings, optimize your routes, and reinvest your earnings to create a flourishing business inside the SimFly ecosystem.

Get ready for the next-level flight experience—your cockpit awaits.
