Once you log into the site with your credentials, you'll find the "Logbook Icon"  at the top right of the screen. This section provides a comprehensive overview of your gaming profile, including both general and specific activities and performance.

Note that while other players can view your logbook, some sections are kept private. Use this page to analyze and enhance your flight skills.

In the Logbook section, you will find:

- *Profile Icon and Details:* Your profile picture, username, registration date, and the number of times your profile has been viewed
- *Experience and Pilot Licenses:* Your XP score and a 'Claim Now' button to transfer XP points to a Pilot License, if you have one
- *Timers:* Information on 24/84 hour timers (this section is hidden from visitors)
- *International Travels:* Flags of visited countries and the frequency of flights to those countries, visible on mouseover
- *Total PAX:* The total amount of PAX tokens you have earned
- *Total XP:* The total XP you have accumulated
- *Total Section:* Comprehensive data on all your registered flights
- *Last Flight:* Details of your most recent flight
- *Average:* Average values of all your recorded flights
- *Economics:* A pie chart and numerical data showing your earnings broken down by categories like Pilot Licenses, Airplanes, and Airports
- *Active Assets:* A list of your active assets with a filter for easy searching
- *Flight Log:* A detailed log of your flights, with the most recent ones at the top. You can review specific flight reports using the 'View' button

- *Flight Map:* A world map displaying your flights, connecting departure and arrival airports. The map is interactive, allowing you to zoom and select flights to view detailed reports of that particular flight

Conclusion

The Logbook is an essential tool for pilots to track their progress, analyze performance, and plan future strategies. It's not just a record of past achievements, but a dynamic dashboard that helps in enhancing the flight simulation experience.

By effectively utilizing the features of the Logbook, pilots can improve their skills, manage their assets more efficiently, and fully engage with the diverse and immersive world of SimFly.
